

AT A GLANCE

2008 Annual HIV/AIDS, STD, and Hepatitis B & C Data;
January 1, 2008 – December 31, 2008

NEW!

Indiana HIV/AIDS Cases	HIV at First Diagnosis	AIDS at First Diagnosis	
New Reports for 2008*	367	146	
	Total Persons With HIV (without an AIDS diagnosis)	Total Persons with AIDS	
Prevalence as of 12/31/08**	4,190	5,063	
Cumulative as of 12/31/08***	4,271	8,866	
Indiana STD Cases	Primary/Secondary Syphilis	Gonorrhea	Chlamydia
1/1/08 – 06/30/08****	68	4,068	10,248
Indiana Hepatitis B & C Cases	Hepatitis B 1/01/08 – 12/31/08	Hepatitis C ***** 1/01/08 – 12/31/08	
	29	7,066	

*New Reports are broken into 2 categories: HIV at First Diagnosis represents all new reports as being diagnosed first with HIV; AIDS at First Diagnosis represents all new reports as being diagnosed first with AIDS

**Prevalence is the number of people who are 'Living' in Indiana with HIV/AIDS, including those diagnosed in other states but living in Indiana.

***Cumulative is the total number of people diagnosed in Indiana both living and dead.

****Data is provisional and will be finalized later in 2009

*****Suspected, probable and confirmed cases based on case investigation submission

Information Update

The reporting of each HIV/AIDS case is required by Indiana law (IC 16-41-2-1). Patients that are diagnosed in another state and are in Indiana must also be reported in Indiana. All infants born to an HIV+ mother are to be reported, even though their final HIV status is not known until later. It is also important to remember that when a patient progresses from HIV infection stage to a diagnosis of AIDS, this must be reported separately. To assist with more accurately defining the impact of HIV and AIDS on Indiana, deaths of those with HIV should also be reported. For assistance, questions, or case report forms and information, please call 1-800-376-2501.

Technical Notes

Some adolescent AIDS cases have pediatric risk factors because they were less than 13 years old when infected.

The Centers for Disease Control and Prevention Annual HIV/AIDS Surveillance Report can be found at:
<http://www.cdc.gov/hiv/stats.htm>.

We are revamping the Spotlight and would appreciate any suggestions you might have on what type of data and in what format you wish to see it presented. Please email dhillman@isdh.in.gov with your comments.

Newly Reported Indiana HIV Cases and AIDS Cases by Mode of Transmission, Reported January 1, 2008 – December 31, 2008

NEW!
